Prices exclude separately quoted items stated on the Scope & Assumptions page. Final quotation controls commercial supply.

SAMAN SMALL OFFICE CABIN

GA & WEBSITE ASSET CONTROL BOARD — 8 × 6 × 8.5 ft

GA LOCKED / V3

DIMENSIONED PLAN & WALL IDENTITY

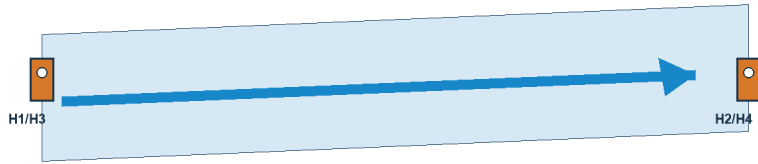

LOCKED ASSET SCHEDULE

- Size: 8 × 6 × 8.5 ft (48 sq.ft.)
- Roof: ONE-WAY — MARGINAL 5–6 INCH DRAINAGE FALL
- Lifting: H1–H4, exactly four compact top-corner eye plates
- Colour: Coral Red
- Openings: 1 external door; 1 windows
- Workstations shown: 1 (staging reference; loose furniture excluded from base price)
- Layout authority: Compact baseline: one door, one window, one workstation

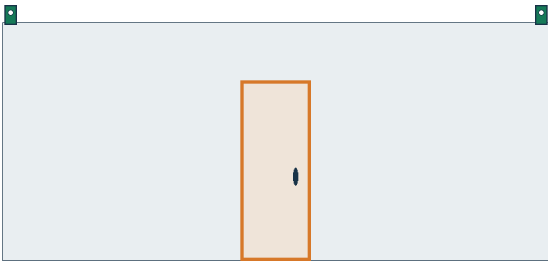

ROOF ORIENTATION LOCK

One plane • 5–6 in total fall across width

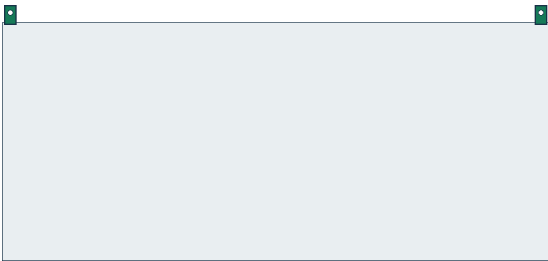

Almost level • no ridge • no gable • no longitudinal fall

Technical Scope

Product-specific small-office intent from the revised workbook; no unverified structural claims

Product intent	Compact one-room office for one to three users in gate, supervisor, dispatch or small-yard applications. The approved GA schedule—not generic product photography—controls every opening and workstation location.
Envelope	Fabricated steel portable-cabin family with vertical external corrugated cladding, coordinated door/window trims and an internally finished office shell. Colours shown are website presentation colours and remain subject to quotation.
Roof control	This is not the ISO/container flat-roof family. The slope is nearly imperceptible: one-way roofs have only 5–6 inches total fall across width; two-way roofs have one full-length centred ridge only 5–6 inches above each long-wall eave.
Lifting hooks	Exactly four compact lifting eye plates are present, one at each rectangular top plan corner H1–H4. No eye plate is permitted at the ridge or mid-span. Final plate, hole and connection details remain shop-drawing controlled.
Opening control	Exterior and interior images use the same physical wall-coordinate schedule. For each 20-foot layout: Wall A is W1-D1-W2, Wall B is W3-W4, End C is W5 and End D is W6. Complete visible walls cannot omit, duplicate, mirror or move openings.
Width control	The 20 x 12 derivative retains every longitudinal coordinate from 20 x 10 and adds one continuous 2-foot clear strip. Interior photography must show the 12-foot cabin visibly wider and must never make it resemble an 8-foot cabin.
Production release	Final member sizes, connections, lifting details, service penetrations and site support conditions remain controlled by the signed quotation and approved fabrication/shop drawings.

Scope, Assumptions & Handover Controls

Commercial boundary from revised workbook

BASE PACKAGE / CONTROLLED

- Compact office shell in one of the six listed sizes
- Locked roof family and GA opening schedule
- Website staging images and technical coordination diagrams
- Ex-GST and GST-inclusive price dashboard values

SEPARATELY QUOTED / EXCLUDED

- Toilet or additional internal partition
- Premium internal lining unless quoted
- Loose furniture shown for staging
- Fitted AC
- Delivery, unloading, placement and site supports
